## SUMMARY

Detail-oriented professional transitioning into software development with strong transferable skills in communication, workflow improvement, data accuracy, and client coordination. Trained in JavaScript, Java, React, Spring Boot, and UI/UX principles through LaunchCode, with hands-on experience designing and building a full-stack, user-centered web application. Seeking a junior front end developer or junior UX/AI designer role where I can contribute to intuitive interfaces, clean design systems, and thoughtful problem-solving in a collaborative environment.

## LANGUAGES | FRAMEWORKS | TOOLS

JavaScript, Java | React, Jest, Spring Boot | Figma, Adobe XD, VSCode, GitHub, Chrome DevTools, MySQL

## EXPERIENCE

### **Skin-Sync** – LaunchCode Capstone Project *Front-End & Back-End Developer (UI/UX Focus)*

- Developed a responsive skincare recommendation app that matches users to the perfect skincare based on their skin type and conditions
- Built a responsive skincare recommendation app connecting a React front end with a Spring Boot / MySQL backend.
- Designed accessible, user-friendly forms with radio buttons and checkboxes, implementing dynamic recommendations using useState, useEffect, and structured JavaScript objects.
- Enhanced accessibility using useRef and organized reusable components
- Developed a REST API in Spring Boot to serve product data and managed a MySQL database for skin type and condition mapping.
- Verified endpoints using Postman and ensured smooth communication between front end and back end.
- Full Project Tech stack: HTML, CSS, JavaScript, React, Java, MySQL, Spring Boot

### **Administrator & Marketing Manager — Verch Dental Ceramics Inc.**

May 2021 - Present

- Manage over 150 lab cases weekly by overseeing intake, data entry, and tracking through Labnet, ensuring 100% accuracy in scheduling, invoicing, and case documentation.
- Coordinate social media marketing campaigns that contributed to a 15% increase in client engagement over a 6-month period through targeted posts, promotional content, and analytics-driven strategy.
- Streamline internal processes by creating customized organizational tools like preference sheets and labeling systems, reducing administrative errors by 30% and improving lab workflow.
- Maintain regular communication with over 50 clients, resolving issues promptly and fostering strong relationships that support client retention and referrals.

### **Dental Technician — Tuma Dental Laboratory**

February 2017 - May 2021

- Designed and fabricated a wide range of dental appliances, including night guards, retainers, and ortho appliances, ensuring precision and comfort based on dentist specifications.
- Utilized 3Shape scan and design software to digitally design crowns, bridges, and other restorations with a high degree of accuracy and consistency.
- Performed intricate waxing and metal finishing for cast restorations, helping maintain the lab's high standards for fit and aesthetics.

## EDUCATION

**St. Louis Community College**, Completed General Education and Prerequisite Coursework, 2016-2018

**LaunchCode**, Software Development, 2025
